PRESIDENT'S
SPEECH

董事长致辞

北京中水科水电科技开发有限公司，(简称中水科技)集中国水利水电科学研究院相关专业六十余年水利水电科研之精华，依托中国长江三峡集团公司水电和清洁能源开发、长江大保护之伟业，以向业界提供技术先进、质量优异的产品和服务为己任，拥有国际领先水平的水力机械试验室以及众多具有自主知识产权的产品和技术，是北京市科学技术委员会认定的高新技术企业。

中水科技已为我国三峡、南水北调、西电东送等数百项重大水利水电工程提供技术、装备和服务，产品已远销国外。

近年来，中水科技以新时代中国特色社会主义思想为指导，发扬求实、创新、团结、奉献的企业精神，锐意进取，不断创新，立志打造一流的行业智能一体化解决方案，满足广大用户不断发展的智能化应用需求，为我国的水利、水电与新能源的智能化建设与科技进步做出应有的贡献。

立足国内，走向世界，努力建设成为国际一流的高新技术企业，是中水科技每一位员工的追求。

值此，我谨代表中水科技全体员工向长期支持和帮助我们的各级领导和广大用户致以衷心的感谢！

中水科技愿与您携手共创美好明天！

Beijing IWHR Technology Co., Ltd (BITC) is a high-tech enterprises, certified by Beijing Municipal Science & Technology Commission (BMSTC). Standing on top of the 60 years' achievement of China Institute of Water Resources and Hydropower Research (IWHR), backed by the great undertaking of China Three Gorges Corporation (CTG), in the development of hydropower and clean energy, protection of Yangtze River, BITC is a responsible enterprise to provide leading technologies, high quality products and services, with a panoply of products and technologies of independent intellectual property right, and the world leading laboratory of hydraulic machinery.

BITC has provided its technological solutions, facilities and services for hundreds of major hydro projects in China and abroad, including Three Gorges project, south-north water transfer project and west-east electricity transmission project, etc.

BITC will take the scientific development view as the instruction, promote the enterprise spirit of practice, innovation, unity, and devotion, go all out to make unceasing innovation, prepare to meet every new requirement of users, and do its best for the construction and advance of science and technology of hydropower and new energy of China.

With spirit of being realistic, innovative, united and dedicated, BITC will make efforts to forge ahead and innovate continuously, and determined to create first-class smart industrial solutions, to meet the increasing needs for smart applications, and made due contributions to the smart construction and technology progress in the field of water resources, hydropower and new energy resources in China.

'Based upon China, opening to the world, diligently make our BITC an international first-class high-tech enterprise' , is the goal of each personnel of BITC.

I am honored to take this opportunity, on behalf of all staff of BITC, to express my heartfelt gratitudes to our customers, who have long been our guides, supporters and friends.

BITC will walk with you hand in hand into the most beautiful tomorrow.

董事长

COMPANY PROFILE

公司介绍

北京中水科水电科技开发有限公司成立于 2004 年 12 月，系中国水利水电科学研究院与中国长江三峡集团有限公司共同出资兴办的高新技术企业，专业覆盖水利、水电、新能源等领域。主要业务包括计算机监控与集控、水轮机调速器、水情测报与水调、水力机械与机电等方面的研究、设计、开发、试验、咨询与服务，以及相关设备的制造、成套及工程总承包等。是中国水力发电工程学会信息化专业委员会、电站控制设备专业委员会、中国电机工程学会水电设备专业委员会及电力行业水电站自动化标准化技术委员会秘书处挂靠单位。

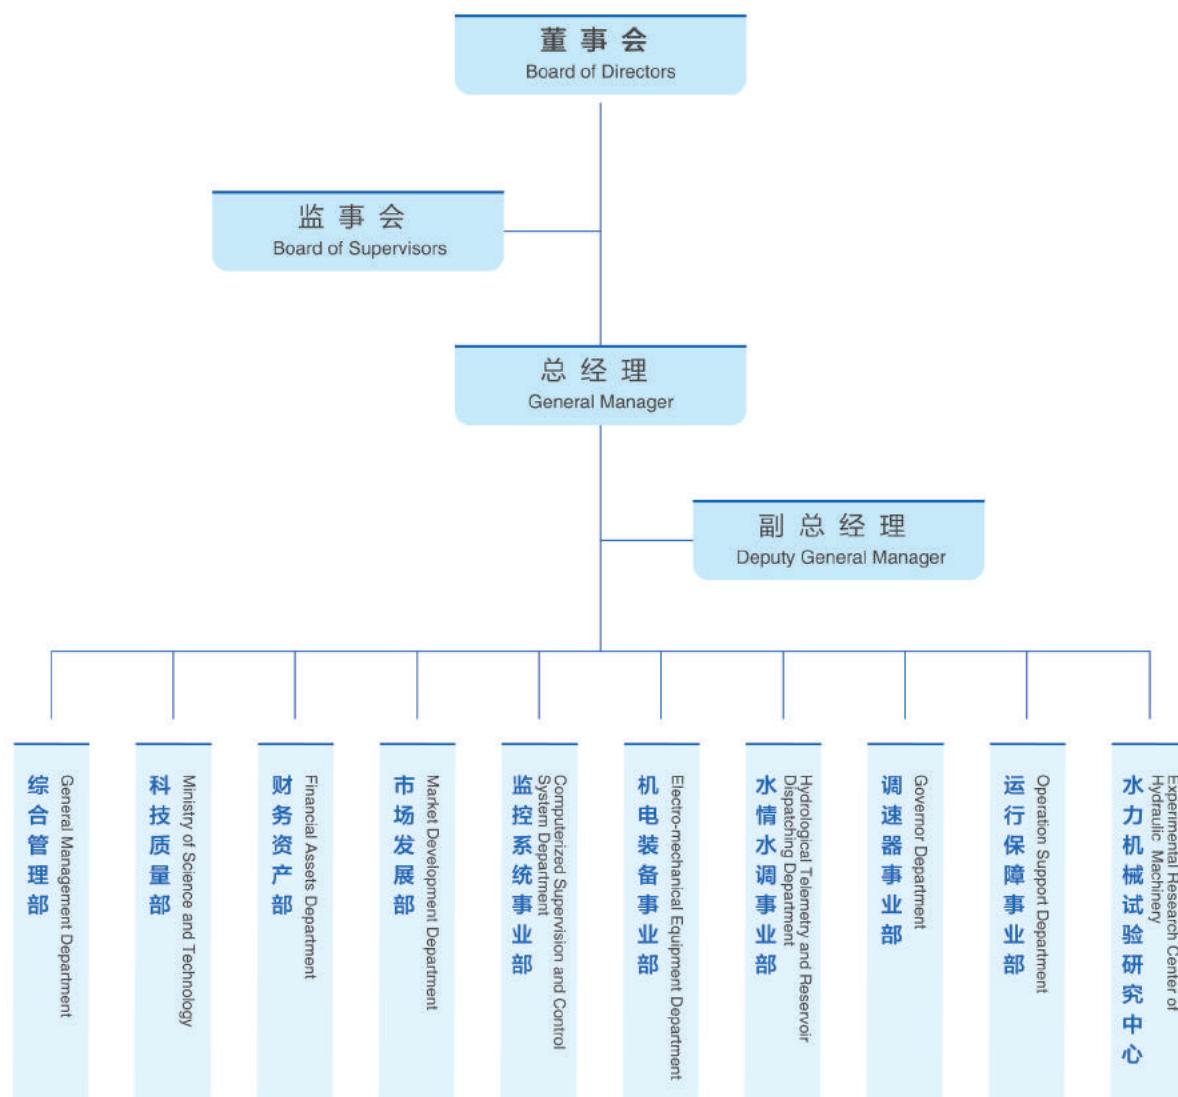

2019 年 7 月，公司有员工 295 人，其中硕士以上人员 92 人，本科 158 人，本科以上学历人数占公司总人数的 85%，教授级高级工程师 32 人，高级工程师 56 人，工程师 44 人。

Beijing IWHR Technology Co., Ltd., a joint venture between China Institute of Water Resources and Hydropower Research (IWHR) and China Three Gorges Corporation (CTG), is a high-tech enterprise, founded in 2004 and specialized in water conservancy, hydropower, new energy etc. Its primary service includes the research, design, development, test, consultation and service on computerized supervision and control system, turbine governor, water regime forecasting and reservoir dispatching, hydraulic machinery and electro-mechanical equipment, as well as manufacture and turn-key of related equipment and EPC. It is also the secretariats of PC-Info, PC-PSCE of CSHE, PC-HPE of CSEE, TC-HSA in electric power standardization.

By the end of July, 2019, BITC has a number of staff of 295, among which, 92 of master's degrees or above, 158 of bachelor degrees, which is 85% of the total staff. BITC has also 32 professors, 56 senior engineers and 44 engineers.

INTRODUCTION OF THE BUSINESS DEPARTMENTS

业务部门介绍

1

监控系统事业部 COMPUTERIZED SUPERVISION AND CONTROL SYSTEM DEPARTMENT

主要从事水利、水电及新能源领域的计算机监控系统、智能一体化平台以及三维仿真、数据可视化、大数据分析与可视化等智慧应用软件的开发、设计、集成和咨询。

30多年来，积极自主创新，形成自主知识产权的H9000系列计算机监控系统。系统以性能可靠、功能完善、界面友好、组态灵活、维护简单、便于扩展等特性，满足了不同用户的需要。已应用于全球装机容量前10大水电站中的5座，以及国内外近300余个大中型水利枢纽、梯级调度中心、抽水蓄能电站、新能源集控中心等工程项目，遍及亚、欧、美、非等大洲近20个国家。也已广泛应用于闸门、泵站、调水工程、污水处理、灌区等领域。

The department is focused on the development, design, integration, engineering and consultation of automation systems, such as computerized supervision and control systems (CSCS), intelligent integrated platforms, 3D simulation & VR, big data analysis & its visualization, etc., related to water conservancy, hydropower and new energy.

A series of H9000 CSCS have been developed by the department since decades, with a full set of applied functions, to meet diversified needs of end-users. For its outstanding performance in reliability, flexibility, expandability, maintainability and user friendly, it has been widely applied in more than 300 projects, in China or abroad, such as large and medium-sized water conservancy hubs, cascade dispatching centers, pump-storage power stations, new energy control centers, including 5 of the World Top 10 hydropower stations. H9000 has also been widely adopted in the control of sluice gates, pump stations, and projects of water diversion, sewage treatment, irrigations, etc.

iP9000智能一体化平台

iP9000 - AN INTELLIGENT INTEGRATION PLATFORM

采用 SOA 架构和面向对象编程技术,结合“云大物移智”等新型 IT 技术,由传统的计算机监控升级为智慧化平台,解决了安全 I、II、III、IV 区系统互联、数据共享和对外接口的问题,并支持第三方智能应用接入。平台同时具备应用软件平台和大数据平台的功能,为各专业智能应用提供运行、集成、维护、开发环境,构建水利、水电及新能源行业成套智慧化解决方案。

iP9000 is BITC's intelligent platform based on SOA architecture and object-oriented programming, recently developed by taking full advantage of new IT technologies such as cloud computing, big data, internet of things, mobile interconnection and artificial intelligence. It provides a platform or way for interconnection of various systems, data sharing and external interface between different security zones. It provides equally a way of integration for third-party smart applications. iP9000 can not only be used as application software platform, but also as big data management platform. It provides an environment of operation, integration, maintenance and development for various intelligent applications. It can be adopted to build up global smart solutions for water conservancy, hydropower and new energy utilities.

调速器事业部 GOVERNOR DEPARTMENT

主要从事水轮机调节系统及装置、辅助设备控制装置、水轮机组综合测试系统、相关基础自动化元件的研究、开发与生产。

Research, development and manufacturing of turbine governor system and equipment, auxiliary control equipment, integrated testing system and related basic automatic components.

主要产品

MAIN PRODUCTS

● 水轮机调节系统及装置

DVG2000 turbine governor system and equipment

● 机组辅助设备控制装置、进水蝶阀 / 球阀控制系统、润滑系统、制动系统与装置

Unit auxiliary control equipment, inlet butterfly valve/ ball valve control system, lubricating system, brake system and equipment

● 机组自动化元件及装置：事故配压阀、分段关闭装置、重锤关机装置、油泵组合阀、主令控制器、转速信号装置等

Unit automatic components and equipment: emergency distributing valve, step closing device, weight-loaded close-down valve, oil pump combined valve, servomotor main switches, speed signal device, etc.

在国际上首次提出并实现了由高速开关阀与插装阀为核心组件的水轮机调速系统，取消了滑阀式主配压阀及传统电液转换等环节。

DVG2000 turbine governor was invented with high speed valve and logic cartridge control valve as its core components, instead of slide valve type main distributing valve and traditional electro-hydraulic conversion.

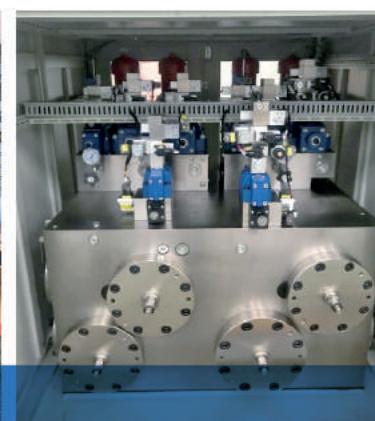

公伯峡水电厂300MW混流机组调速器
300MW Francis turbine governor for Gongboxia hydropower plant

凤滩水电厂200MW组合式事故配压阀和分段关闭阀
200MW combined emergency distributing valve and step closing valve for Fengtan hydropower plant

葛洲坝水电厂150MW轴流转桨机组调速器
150MW Kaplan turbine governor for Gezhouba hydropower plant

广西红花水电厂38MW贯流机组调速器
38MW tubular turbine governor for Honghua hydropower plant, Guangxi

赞比亚Lunzu水电厂冲击机组调速器
Pelton turbine governor for Lunzu hydropower plant, Zambia

主要业绩

6 水力机械试验研究中心 EXPERIMENTAL RESEARCH CENTER OF HYDRAULIC MACHINERY

主要从事水力机械模型试验及泥沙磨损、空化空蚀等试验研究，是中国国家认证认可监督委员会“水电站水力设备质量检验测试中心”的重要组成部分。拥有功能齐全、国际领先水平的水力机械模型通用试验台3座，冲击式水轮机模型试验台1座，水力机械磨耗测试系统1座。可承担水轮机、水泵和水泵水轮机等研究及模型验收、同台对比等试验任务。

完成三峡右岸、向家坝、乌东德、白鹤滩、南水北调、土耳其的BH电站、巴基斯坦的PATRIND电站等水利水电工程的试验研究、模型验收试验、同台对比试验和国际合作项目50多项。

The Experimental Research Center of Hydraulic Machinery is mainly engaged in hydraulic machinery model test and sediment wear, cavitation erosion and other experimental studies. Fully-featured and top-level test rigs for hydraulic machinery are equipped, including three universal model test rigs for hydraulic machinery, one model test rig for Pelton turbine and one Abrasion and Erosion Testing System for Hydraulic Machinery. It can undertake the research, model acceptance test and comparative test of turbines, pumps and pump-turbines on the test rigs.

More than 50 projects about model test and related research have been completed, including the right bank of Three Gorges, Xiangjiaba, Wudongde, Baihetan, the South-to-North Water Diversion Project, BAYRAMHACILI in Turkey and Parind in Pakistan, etc.

水力机械模型通用试验台 UNIVERSAL MODEL TEST RIG FOR HYDRAULIC MACHINERY

水力机械模型通用试验台主要参数

MAIN PARAMETERS OF UNIVERSAL MODEL TEST RIGS

试验台 Test Rig	TP1	TP2	TP3
最高试验水头 Test Head Hmax.(m)	150	20	60
最大流量 Test Discharge Qmax.(m ³ /s)	2.0	1.5	1.0
动力主泵功率 Main Pump Motor (kW)	724×2	593	593
测功电机功率 Dynamo-meter (kW)	540	300	300
试验转速 Test Speed (r/min)	0~2600	0~3000	0~3000
转轮直径 Model Runner D1(mm)	250~500	250~500	250~500
效率测量不确定度 Total Error of Efficiency (%)	<±0.2	<±0.2	<±0.2 (IN CLEAN WATER) <±0.4 (IN SAND-WATER)

泥沙磨损及空化空蚀试验装置参数

TEST FACILITIES OF SILT ABRASION AND CAVITATION EROSION

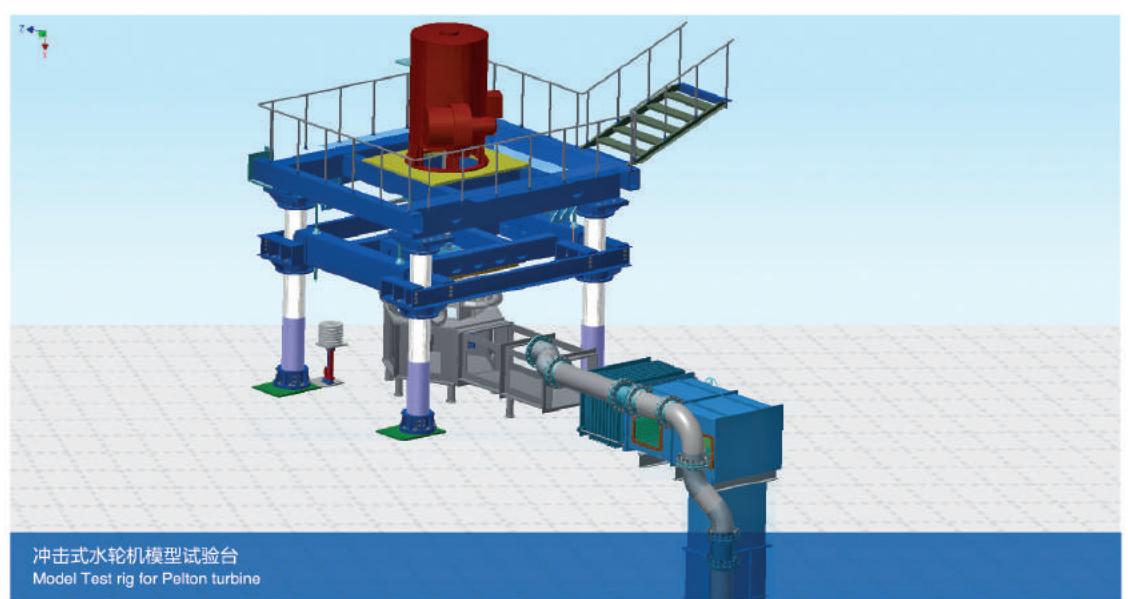

装置名称 Name of Facilities	配套动力 Power of Motor (kW)	工作段流速 Velocity of Test (m/s)	用途 Function
水洞 Water tunnel abrasion device	110	~45	空化空蚀与磨损研究 Study on the cavitation erosion and silt abrasion
旋转圆盘 Rotating-disc	37	~85	
旋转喷射仪 Rotating-disc jet abrasion device	37	~120	磨损与选材试验 Silt abrasion test of materials

冲击式试验台主要参数

MAIN PARAMETERS OF MODEL TEST RIG FOR PELTON TURBINE

最高试验水头 Test Head Hmax.(m)	最大流量 Test Discharge Qmax.(m ³ /s)	动力主泵功率 Main Pump Motor (kW)	测功电机功率 Dynamo-meter (kW)	转轮直径 Model Runner D1(mm)	效率测量不确定度 Total Error of Efficiency (%)
240	350	500×2	540	250~500	<±0.25
